BOO AT THE ZOO

RAINFOREST-SAFE CANDY GUIDE

Palm oil has taken over the packaged-goods market as a cheap substitute that is found in 50% of the goods we use everyday — including Halloween Candy. But this “cheap” alternative comes at a big price: it’s production contributes to the widespread loss of the world’s rainforests. You can do your part to help by only supporting companies that make sustainable, palm-oil-free candies this Halloween.
